### **DESCRIPTION**

**NEUTRALENE® 2012** is a degreaser specifically used to eliminate oils and greases.

**NEUTRALENE® 2012** has been formulated in a technology flash point not measurable, and offers more security in the industry. His evaporation rate is particularly suitable for the product has a cleansing action optimal, while evaporating as quickly as possible.

**NEUTRALENE® 2012** leaves no residues. This is an excellent agent for preparing surfaces before treatment (paints, collage).

**NEUTRALENE® 2012** is compatible with all metals, some plastics and elastomers. It contains no stabilizer, which prevents any further oxidation problem.

**NEUTRALENE® 2012** is used pure, cold, with any manual or industrial process.

## APPLICATIONS

### Cleaner / Degreaser

Excellent solvent for greases, oils, temporal protection product, waxes :

Degreasing of metal parts (aluminum, steel, stainless steel, brass, cast...)

Cleaning of injection molds

Slides degreasing of machine tools.

Degreasing after machining processing

### Surface's preparation

Removes organic or inorganic pollutions before assembling or before surface treatment

(collage, paints...)

### Industrial maintenance

For cleaning and degreasing packaging equipment or handling.

Cleaning of workplaces

Degreasing of machines

## PRECAUTION OF USE

Before utilization, look at the MSDS. Remove all ignition sources, more particularly, do not use onto an incandescent object or hot source. Do not use vapor. Avoid splashing onto fabrics to avoid the effects of wick. Do not smoke. Do not allow the drain after use. Use in ventilated area.

## RECOMMANDATIONS

Regarding to the diversity of substrates, and more particularly thermoplastics or thermosets used in industries, we recommend operators to perform any tests of compatibility with sensitive materials washing and degreasing.

These compatibilities often depend procedures and therefore the contact time between solvent and plastic materials.
